

Welder Qualification Record (WQR) Verification

Special Inspection

Agency _____ Project Name _____

Project Address _____ Permit Number _____

Welder Name	Qualified Welding Process	Qualified Thickness & Position	Original Qualification Date	Update Letter Received Date

The inspector shall review all Welder Qualification Records (WQR) to verify that the welder is qualified to weld the joint types, materials and material thicknesses specified in the approved project plans. The inspector shall also review welder documentation to verify that the welder's qualification is current and is in accordance with the applicable AWS welding code. The inspector shall also verify that the welder is qualified to weld using the welding process specified. The inspector certifies, by signing and dating this form, that all reviewed WQR information is complete and in compliance with the applicable AWS welding code.

Inspector Name (printed)

Signature

Date

This form shall be included in the Special Inspection final report. WQR supporting documents for all welders that worked on this project only are required to be included in the Special Inspection final report and are required to be maintained in the Special Inspection project files for future reference.
